(54) DIGITAL COPYING MACHINE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a digital copying device by which a copy operation can be attained at a high speed without providing any page buffer by forming a printer and a scanner in different casing.

SOLUTION: This device is provided with a scanner 100 having a single scanner function, a printer engine 210 having a single picture forming function, a print controller board 220 having the communication control of information with an outside equipment and the print control function of the printer engine 210, and a copy controller board 29 including a DRAM 243 for storing video data from the scanner 100 and a bus 244 for copy for transferring the stored video data to a system controller part 223 of the printer controller board 220, which transmits image data read by the scanner unit 100 to the printer controller board 220. The image data read by the scanner unit 100 are transmitted from the copy controller board 240 through the printer controller board 220 to the printer engine 210, and printed out by the printer engine 210.
